PROFESSIONAL SUMMARY

Full-stack web developer with hands-on experience designing and building responsive, production-ready web applications using React.js, Next.js, Node.js, and Express.js. Skilled in REST API integration, component-based frontend architecture, and deployment workflows on Vercel. Self-directed learner who has independently conceived, built, and shipped multiple full-stack projects end to end, backed by a disciplined, problem-solving approach to real-world development.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, RESTful API Design & Integration

Languages: JavaScript, Python

Tools & Platforms: Git, GitHub, Vercel, VS Code

Core Concepts: Component Architecture, API Integration, Data Structures & Algorithms, Agile Self-Directed Development

PROFESSIONAL EXPERIENCE

Frontend Developer | Bigscal Technologies Pvt. Ltd. | June 2026 – Present

- Working full-time as a Frontend Developer, building and maintaining production-grade web applications for enterprise clients.
- Contributing to the frontend development of a Human Resource Management System (HRMS) dashboard, building admin-facing UI and structured data views.
- Collaborating on dashboard workflows to support HR data presentation and usability.

JD's IPL Web Application | React.js, Next.js

- Architected and developed a dynamic IPL score and cricket information platform, delivering real-time match data through a fully responsive UI.
- Designed a reusable component architecture to support live score updates and player/team statistics across devices.

Live: jds-ipl.vercel.app

Day Vibes — Productivity Platform | React.js, Next.js

- Built a full-stack productivity and daily management web application with a focus on clean UI/UX and optimized page performance.
- Engineered a modular component structure to streamline feature development and long-term maintainability.
